REQUEST FOR PROPOSALS
FOR AN
ADVANCED METERING INFRASTRUCTURE SYSTEM

INTRODUCTION

The City of West Columbia, South Carolina would like to install and implement an Advanced Metering Infrastructure (AMI) system and are inviting Proposals from qualified vendors. The scope will include the selection and implementation of a Fixed Based System that will work effectively with West Columbia's personnel and existing infrastructure.

The intent of this Proposal is to allow each vendor to provide West Columbia with an optimal solution for an AMI system. The optimal solution will allow the City to take advantage of the most advanced metering technology available.

The Sealed Proposals for the AMI system for West Columbia, South Carolina will be received by West Columbia at 2:00 pm on or before February 4th, 2021. Proposals must be mailed, or, hand delivered to Jeremy Bristow at West Columbia, 200 North 12th Street, West Columbia, SC 29171.

EXISTING SYSTEM DESCRIPTION

West Columbia has approximately 15,379 meters on their system and none of the meters have been GPS-located. Approximately 9,095 meters have been "Geo-Located," or, placed in an approximate location near the meter. The balance of the meters have been located by placing a dot on the center of the roof of the house. An inventory of all meters is listed below based on size and manufacturer. The City has requested to include an additional 500 meters for general growth and new subdivisions. A list of all meters with latitude and longitude is attached as **Exhibit A**.

Below is a table showing the quantities of the various sizes of meters that are on West Columbia's water system:

Meter Size	Quantity
3/4"	14,831
1"	197
1.5"	181
2"	94
Unknown	28
Additional Meters for Growth	500
Total ¾"-2"	**15,831**
3"	19
4"	11
6"	12
8"	6
Total	**15,879**

Table 1: West Columbia Meter Size Quantities

Meter Manufacturers: It is assumed that most of all West Columbia's existing water meters are manufactured by Badger Meter, Inc.

Existing Elevated Tanks: There are currently four existing elevated water storage tanks available for use in this project. A list of the City's elevated water storage tanks is attached as **Exhibit B.** It should also be noted that the Platt Springs Tank may be at maximum capacity for number of antennas currently installed and may require structural improvements depending on the proposed equipment.

City Owned Property: A list of the City owned property is attached as **Exhibit C.**

The service area of the project will include West Columbia, South Carolina. A map showing the extents of West Columbia and their water system is attached as **Exhibit D**.

SCOPE

The scope of work to be completed shall include the provision of all equipment, materials, software, training, and all other appurtenances necessary to provide a functional Advanced Metering Infrastructure system. The intent of West Columbia is to award to a Vendor a contract to supply a complete Advanced Metering Infrastructure system.

The proposal shall include a Lump Sum Price for a complete AMI system. Supporting documentation shall be included with the proposal as required herein. The price should represent the cost of a system that is capable of meeting current and future metering needs within the subject service area. The system must be capable of receiving, storing, and transmitting data to and from meters from a central location. The system shall also be capable of accepting both manual and mobile reading entries. The manufacturing facility or facilities from which all parts for the system are furnished shall be an ISO 9001 rated facility.

The host software shall be meter reading software which is compatible with West Columbia's Encode by Tyler Technologies software and their existing data collection devices. The service provider is responsible for ensuring that the transfer files are compatible with the billing software. The host software must be configured for either a standalone installation or to operate in a client/server environment.

Each Vendor shall provide within their Proposal a complete list of the equipment needed and the capabilities of said equipment as detailed below.

Some of the items which are critical for this proposal have provided below. A response to each of these items in the order they are presented below shall be included with the Proposal. A propagation study will be required to provide an adequate response to some of these items. The Owner will award the project based on which system provides the best value to the Owner and may not be the lowest bid submitted by the Vendors. The Vendor is urged to organize their Proposal based on the items listed below. A copy of this file will be made available if requested. Typical sales literature can be attached as Supplemental Information. Proposals will be evaluated based on the responses to the items below:

1. <u>Water Meters/Registers</u>

    A. Provide specifications of water metering devices to be used for residential, commercial, and industrial uses.

    B. Describe the type/model of meter/register to be provided for each specific use.

    C. Provide technical information regarding the size and length of each type of meter to be used.

    D. Provide a normal flow range for each meter type and size as well as a low flow accuracy.

    E. Provide a description of display capabilities and options for the register to be provided.

    F. Provide a description of the meter/register housing geometry and material.

    G. Provide a list of standards that your meter/register meets.

H. Provide technical information regarding meter pressure ratings.

I. Provide information on advanced meter technology that may provide additional information on pressure, temperature, water quality and remote shutoff capabilities.

J. Describe factory quality assurance/testing specific to each unit.

K. Describe how the meters are connected to the encoder for different pit environments.

L. Provide a list of display options to be available for each register.

M. Describe the cross compatibility of the register with existing meter types.

N. Provide the number of digits that can be displayed by the registers and describe the alarms that can be displayed.

O. Include the service life for each item of proposed equipment.

P. Include the warranties and / or guarantee policy with respect to each item of proposed equipment. Provide a procedure for submitting warranty claims.

Q. Provide current pricing information for each item of proposed equipment to include delivery of the meter to the project site. Installation will be covered in a separate section of this request for proposal.

2. Meter Radio Transmitting Unit (MRTU)

A. Provide type/model of Meter Radio Transmitting Units (MRTU) to be provided.

B. Provide description of MRTU housing geometry and material.

C. Describe how MRTUs are connected to meter and how the unit is configured within the meter box.

D. Provide list of available options for MRTU with respect to the number of ports for single and multi-meter installations.

E. Provide number of daily transmissions sent by the MRTUs.

F. Provide the frequency of readings collected by the MRTUs.

G. Provide the maximum storage capacity of the MRTUs.

H. Explain how the MRTUs recover or backfill any readings from transmissions that are missed.

I. Supply the power output of the MRTUs in Watts.

J. Provide information on the MRTUs capabilities of transmitting data through metal or polymer meter box lids.

K. Explain cross-manufacturer compatibility of MRTUs. Provide list of compatible manufacturers.

L. Describe the ability of MRTUs to be used for AMI systems. If units are cross-compatible, describe the process for converting from AMI and vice-versa.

M. Provide information on the ability of MRTU to operate without malfunction in various pit conditions, including submerged in a wet pit.

N. Provide the number of digits and resolution that can be collected/transmitted by the MRTUs.

O. Provide information regarding the FCC approval of MRTUs including which FCC part(s) the MRTUs have been approved under.

P. Describe the unique identifier provided for MRTUs within the AMI system (if applicable).

Q. Provide information on battery life of MRTUs (if applicable).

R. Provide the approximate number of currently working MRTUs that have been provided by the company for use in the same system as what is being proposed. In order to be included in total, MRTUs must be the same type and technology as the proposed system. Earlier versions are acceptable as long as the technology is the same.

S. Include the service life for each item of proposed equipment.

T. Include the warranties and / or guarantee policy with respect to each item of proposed equipment. Provide a procedure for submitting warranty claims.

U. Provide current pricing information for each item of proposed equipment. Installation will be covered in a separate section of this request for proposal.

3. <u>Mobile Data Collector</u>

A. Provide information on the type of Mobile Data Collector (MDC) that will be used. Provide the estimated number of meters and their respective transmitting units that will be read using this unit.

B. Provide description of required system components (handheld, laptop, antenna, MDC, etc.), including specifications such as type and speed of processor, RAM, HDD, Display, wireless and Bluetooth capabilities, and USB ports.

C. Include description of power source for MDC.

D. Provide details on data preservation (e.g., backup battery).

E. Describe how MDC will communicate with operator/driver (visual and auditory signals, etc.)

F. Provide specifications of reading system software including compatibility with Windows/Mac, 32bit vs. 64bit, etc.

G. Describe how software will display results of reading and how problem codes will be displayed.

H. Provide the number of digits and resolution that can be collected/transmitted by the MRTUs.

I. Provide the expected range capabilities for transmission of data from meter transmitting units to MDC. Assume "typical" conditions without any significant impediments.

J. Provide system guarantee to include percentage of successful reads and coverage area guarantees.

K. Include the service life for each item of proposed equipment.

L. Include the warranties and / or guarantee policy with respect to each item of proposed equipment. Provide a procedure for submitting warranty claims.

M. Provide current pricing information for each item of proposed equipment.

4. Fixed Base Data Collector

A. Provide information on the type and number of fixed base stations that would be necessary to transmit the data from all of the meters to the Billing System Interface. Provide the estimated number of meters and their respective transmitting units that will be read using this unit.

B. Describe the power and internet requirements at each of the stations as well as an estimate of set-up and recurring charges.

C. Describe process technology for receiving, storing and sending data (e.g., "store and send") for all FBDCs.

D. Describe backup power source for Fixed Base Data Collector (FBDC).

E. Describe the connection between the fixed base FBDC(s) and data server(s). This information should include presence of primary and secondary data links, the one-way/two-way status of all connections and the data rate (BAUD).

F. Explain how FBDC units recover missed readings in the event an outage that prevents the unit from transmitting data back to the servers.

G. Provide maximum storage capabilities of the FBDC.

H. Provide alternative processes for collecting data loss in the event an outage duration exceeds the maximum storage capacity of the FBDC.

I. Provide information regarding the coverage achieved with the proposed FBDC's including the amount of overlap or redundancy provided by the proposed layout.

J. Provide power output of FBDCs in Watts.

K. Provide detailed information regarding the frequency over which the data will be transmitted. Information should include, but not be limited to licensed or unlicensed frequencies that are utilized, what frequencies are utilized and how interference is prevented.

L. Supply information on the expected service life of all Fixed Base Meter Reading equipment.

M. Provide the expected range capabilities for transmission of data from meter transmitting units to FBDC. Assume "typical" conditions without any significant impediments.

N. Provide system guarantee to include percentage of successful reads and coverage area guarantees.

O. Include the service life for each item of proposed equipment.

P. Include the warranties and / or guarantee policy with respect to each item of proposed equipment. Provide a procedure for submitting warranty claims.

Q. Provide current pricing information for each item of proposed equipment.

5. Data Management System/Billing System Interface

A. Provide information on all available systems for transferring the meter reading information from the meter to the Tyler Technologies Encode billing system.

B. Describe the ability of the data management software to accept data from the Tyler Technologies Encode billing system and export data back to the Encode system, including the output types available.

C. Provide the type of server recommended, whether local or cloud-based along with the advantages of this system over other alternates.

D. Provide all of the attributes of each system recommended/provided. Specific attributes shall include processing speed, reliability, service life, backup capability and redundancy, available memory, number and type of hard drives, power supply, security hardware and any necessary software.

E. For cloud-based servers, include the location of each server, redundancy capabilities and guaranteed percent operational value (e.g., servers will be accessible and operational 99% of the time).

F. Describe the capability of the system to monitor and report the condition of the collection devices in the system.

G. Describe the system's capability of monitoring and reporting meter read failures, high/low meter usage, leak conditions, tamper, etc.

H. Describe the capabilities that may be made available to the Owner regarding the ability to retrieve instantaneous data at the City's billing office at any time for any individual meter.

I. Explain the system's capabilities of transmitting location data from each meter and how it is relayed visually to the data management software.

J. Provide the maximum storage ability for meter data (how many days/months of history are maintained on server).

K. For hard drive redundancy, provide the minimum number of days' worth of data kept in redundancy.

L. Include the service life for each item of proposed equipment.

M. Include the warranties and / or guarantee policy with respect to each item of proposed equipment. Provide a procedure for submitting warranty claims.

N. Provide current pricing information for each item of proposed equipment.

6. System Maintenance, Operation & Support

A. Supply information on required or optional maintenance programs beyond the warranty period for both hardware and software. Features of those programs shall also be included with any additional charges such as hourly rate for on-site and/or remote support. The locations of and procedures for obtaining such support shall be stated.

B. Include description and costs for all upgrades for equipment manufacturer's licensed software.

C. Include technical support cost and availability. Provide information regarding typical days/hours of availability for on-site and remote support. Provide average or estimated response times for both remote and on-site support. If cost varies based on day, time or any other factor, please specify.

D. During the project, the manufacturer shall include a toll-free support number that can be used by the users of the system to report any issues that arise. Access to the messages on this number shall be available to the City, Engineer and the installing Contractor. A live operator shall be available to determine emergency and normal responses and be able to contact the installing Contractor after hours.

E. The manufacturer shall also include a tool kit of information such as bill inserts, door hangers, letters to the customers, post cards, timelines and possible web pages such as Next Door.

F. Describe the availability of loaner equipment for situations where support has determined such equipment is necessary to resolve the problem.

G. Where internet is required for operation/transmission, provide estimated monthly fees as well as costs for any additional equipment that is necessary for internet use.

H. Provide all monthly, annual and one-time fees for any products or services not previously covered in this document. Include descriptions of products and services for which fees are charged.

I. Describe the required training to ensure that all of the Owner's personnel are comfortable and competent in the operation and maintenance of the system. Include any costs that may be associated with the training and the expected duration of training required.

7. Meter Replacement & System Data Transfer

A. When a meter is replaced, the Encode billing system must be updated accordingly to match the new meter information. Provide detailed information regarding how this transfer of data will be accomplished.

B. Meter Location: Describe how progress of meter installations will be monitored and relayed to the Engineer and City. At a minimum the installer shall use mapping software by ESRI. Specifically, a mapping application named "ArcGIS Field Maps" shall be utilized to show the progress of meter installations throughout the City. The installer's

responsibility will be to change the status of the meter location and provide a more accurate location for the City's future use.

C. Location Accuracy: Describe the process of how meters will be located and the relative accuracy of each meter location.

D. Provide pricing for installation of all meters, ¾" through 2" meters, itemized per size. Price should be given for replacement of meters under typical conditions.

E. Extraordinary circumstances requiring excessive labor and/or materials will warrant additional payment. Meter manufacturer shall supply a list and price of commonly encountered items that require excessive labor and materials. Additionally, provide a price for the following at minimum:

1. Replacement Water Meter Box for all sizes:

    a. Provide 430 meter boxes for ¾"-1" meters. Use NDS-D 1200 plastic box.
    b. Provide 10 meter boxes for 1.5" meters. Use NDS-D 15AMR2 plastic box.
    c. Provide 7 meter boxes for 2" meters. Use NDS-D 15AMR2 plastic box.
    d. Provide 45 meter boxes for ¾"-1" meters that are traffic rated.
    e. Provide 5 meter boxes for 1.5" meters that are traffic rated.
    f. Provide 3 meter boxes for 2" meters that are traffic rated.
    g. Traffic rated boxes shall be cast iron, ductile iron or composite and shall have matching lids. Sizes shall be similar to the plastic boxes listed above.

2. Replacement Water Meter Box Lids:

    a. Provide 200 plastic lids for non-traffic areas. Provide NDS-D1200-DITRL.
    b. Provide 200 cast iron lids for traffic areas. Provide NDS-D1200-CIL.

3. Modify Existing Meter Box Lids

    a. If a water meter box lid is to be modified to accept a Meter Radio Transmitting Unit (MRTU), provide a price for cutting or drilling a hole into the existing meter box lid to accept the MRTU. Provide a price for a mixture of cutting and drilling that equals a total of 15,831.

4. Miscellaneous Piping for Non-Typical Conditions

    a. Provide a price for up to three feet of ¾" piping necessary to replumb the new meter. Estimated quantity is 300 meters that might need piping modifications.
    b. Provide a price for up to three feet of 1" piping necessary to replumb the new meter. Estimated quantity is 5 meters that might need piping modifications.
    c. Provide a price for up to three feet of 1.5" piping necessary to replumb the new meter. Estimated quantity is 5 meters that might need piping modifications.
    d. Provide a price for up to three feet of 2" piping necessary to replumb the new meter. Estimated quantity is 2 meters that might need piping modifications.

e. Provide a price for each of the sizes (¾”-2”) for a total replacement of the yoke that supports the meter. Provide a price for one ¾” yoke, one 1” yoke, one 1.5” yoke and one 2” yoke.

f. A picture is required of the meter and the associated piping prior to completion and after all work is completed.

8. Company Information/Qualifications

A. Briefly describe the company. Include the products and services provided by the company as well as indicators of company size (approximate number of facilities, employees, etc.) and age.

B. Provide list of project team members including subcontractors.

C. Describe the company’s qualifications as related to the proposed project. Include years of experience with comparable projects.

D. Include references for AMI systems. Reference list should include contact information such as phone numbers and email addresses. List of references should include comparable projects in South Carolina and in a wet pit environment.

9. System Implementation

A. Provide a labor price per unit to assist in the normal transfer of the new meter into the existing meter box while maintaining a paper trail that can be utilized by the Billing Department.

B. Please include a list of any unusual circumstances that may result in additional labor charges.

C. Provide a list of insurances that will be carried by the installation crews during the project.

D. Provide a typical daily, weekly and monthly production level and a guarantee of how many months will be required to transfer all meters.

10. Complete System Price

A. Provide a total price for a complete AMI system. It should be noted that all equipment and meters will be purchased within 1 year.

B. All of the prices listed within this Proposal shall be good for a period of 6 months.

C. Provide the maximum period for which the initial pricing is guaranteed to be fixed.

CONDITIONS

Bidding Vendors are encouraged to request more detailed information on the project in writing. Questions are allowed in the form of writing to clear up any misconceptions or to offer any proposed changes, etc. Any request or questions shall be submitted in writing no later than January 29th, 2021 at 12:00pm and are to be emailed to Jeremy Bristow at Jbristow@westcolumbiasc.gov with a copy to Michael Hanna at Mike@HannaEngineering.com.

Each manufacturer submitting a proposal shall accept the responsibility of becoming fully acquainted with the scope, special conditions and restrictions described herein. Failure to become fully acquainted with the details of this Proposal shall in no way relieve the firm of any obligation with respect to the Proposal or to the contract. All amendments to and interpretations of the solicitation shall be in writing and issued by Hanna Engineering and shall not be legally bound by any amendment or interpretation that is not in writing.

Each manufacturer shall certify that they will comply with the applicable requirements of the South Carolina Code of Laws Title 41, Chapter 8 and agrees to provide any documentation required to establish that they are in compliance as well as any subcontractors they are using. In addition to completing and maintaining the federal employment eligibility verification form (Form I-9), the manufacturer must, within three business days after employing a new employee, verify the employee's work authorization through the E-Verify federal work authorization program administered by the U.S. Department of Homeland Security. Employers may no longer confirm a new employee's employment authorization with a driver's license or state identification card.

The selected manufacturer shall be required to secure a Business License from the City of West Columbia for all work to be performed in the City.

The selected manufacturer shall be required to enter into an agreement for the project work described herein. A copy of the agreement, applicable forms and bonds can be provided upon request.

West Columbia reserves the right to accept or reject any, all or any part of proposals received as a result of this request, to waive any informalities or to cancel in part or in its entirety this request, if it is in its best interest to do so. The City will be the sole judge as to whether proposals submitted meet all requirements. All proposals submitted shall become property of the City. This solicitation does not commit the City to award a contract, to pay any cost incurred in the preparation of these proposals or to procure or contract for goods or services. The City of West Columbia is an Equal Opportunity Employer.
