It shall be unlawful for any person to make unauthorized changes to the zoning map.

402 Zoning maps other than official copy

Any copy of the official map of the City of West Columbia zoning classifications, other than the “official copy”, is in no way warranted as correct at any time. The “official copy” shall always be the copy used for interpretation by the zoning administrator or his/her designee, the planning commission, the board of zoning appeals and the city council. The “official copy” shall be used in any court proceedings.

403 Rules for determining zoning district boundaries

Where uncertainty exists as to the boundaries of any zoning districts, the following general rules of interpretations shall apply. It is the duty of the zoning administrator or his/her designee to interpret the location of zoning district boundaries. 403.7 Where boundaries approximately parallel or are extensions of above features. District boundaries indicated as approximately parallel to or extensions of features indicated in subsections above shall be so construed and at such distance therefrom as indicated on the official copy of the zoning map. Distances not specifically indicated on the official copy of the zoning map shall be determined by the scale of the map.

404 Lots divided by district boundaries

When a district boundary line as appearing on the zoning map divides a lot in single ownership at the time of the adoption of this ordinance, or subsequent amendment, into two or more different districts, the board of zoning appeals may permit, as special exception, the extension of the regulations for either portion of the lot, not to exceed fifty (50) feet beyond the district line into the remaining portion of the lot.

ARTICLE 5 APPLICATION OF REGULATIONS

Within each zoning district, the regulations set forth by this ordinance shall apply uniformly to each class or kind of structure or land. In their interpretations and application, the provisions of this ordinance shall be held to be minimum requirements adopted for the promotion of the public health, safety, or general welfare.

500 Zoning affects all lands, buildings, and structures

No building, structure or land shall hereafter be used or occupied, and no building or structure or part thereof shall hereafter be erected, constructed, reconstructed, moved or structurally altered unless in conformity with all of the regulations herein specified for the district in which it is located.

501 Height and density

No building or other structure shall hereafter be created or altered to:

- (1) Exceed the height limitation;
- (2) House a greater number of families or occupy a smaller lot area per family or occupy a greater percentage of lot area;
- (3) To have narrower or smaller rear yards, front yards, side yards or other open spaces than herein required; or
- (4) In any other manner be created or altered to be contrary to the provisions of this ordinance.

502 Yard space to one building

No part of a yard or other open space or off-street parking or loading space required about or in connection with any building for the purpose of complying with this ordinance shall be included as part of a yard, open space or off-street parking or loading space similarly required for any other building.

503 One principal building to a lot

Only one principal building and its customary accessory building(s) may hereafter be erected on any lot of record, except as otherwise provided by this ordinance. See section 801 for exceptions permitting group developments.

504 Reduction of lot area

No lot, even though it may consist of one (1) or more adjacent lots of record, shall be reduced in size so that the lot width or depth, front, side, or rear yard, lot area per family or other requirements of this ordinance, are not maintained, except as allowed in Section 709 - Planned unit development and Section 806 - Cluster housing development.

No lot shall hereinafter be created or altered which is below the applicable district minimum requirement.

505 Street Frontage

No principal building shall be erected on any lot which does not have immediate frontage on at least one (1) public street or road for a distance of not less than fifty (50) feet, except as allowed in Section 801 - Group housing

development.

506 Inspection of required buffers

In the event a screening wall, fence, planted dividing strip, or any other type of buffer is required by the ordinance for any use or is required by the board of zoning appeals, such screen, wall, etc. will be subjected to periodic inspections by the zoning administrator or his/her designee to determine that such required walls, fences, etc., are being properly maintained. In the case of landscaping, all planted material shall be maintained in a healthy, growing condition, neat and orderly in appearance. Failure to maintain such required walls, fences, etc. to an acceptable standard as determined by the zoning administrator or his/her designee may be deemed to be a violation of this ordinance.

507 Compatibility with other ordinances

When requirements of this ordinance are at variance with requirements of any other applicable rule, regulation, ordinance or statute, the most restrictive requirements or those imposing the highest standards shall apply.

508 Rights-of-way

Public rights-of-way or private easements for streets and roads shall not be considered as a part of a lot or open space, or front, rear, or side yard setback for the purpose of meeting lot dimensions or area or setback requirements.

ARTICLE 6 GENERAL PROVISIONS

600 Nonconforming uses

Within the districts established by this ordinance, or by amendments which may later be adopted, there exist lots, structures, uses of land and structures, and characteristics of use which were lawful before this ordinance was passed or amended, but which would be prohibited or regulated and restricted under the terms of this ordinance or future amendment. It is the intent of this ordinance to permit these nonconformities to continue until they are removed, but not to encourage their survival. Nonconforming uses are declared by this ordinance to be incompatible with permitted uses in the districts involved. It is further the intent of this ordinance that nonconformities shall not be enlarged upon, expanded or extended, reconstructed to continue nonconformity after major damage, or used as grounds for adding other structures or uses prohibited elsewhere in the same district. However, Article 9 regulating signs has specific requirements that must be met over and above those contained herein.

601 Continuance of nonconforming uses, structures or characteristics of use

601.1 Change to another nonconforming use. A nonconforming use, structure or characteristic of use shall not be changed to any other nonconforming use, structure or characteristic or use unless the board of zoning appeals finds that the new use, structure or characteristic of use is more in character with the uses permitted in the district; in which case, the board of zoning appeals may permit such change as a special exception. In permitting such change, the board of zoning appeals may require appropriate conditions and safeguards in accord with the purpose of this ordinance.

601.2 Conversion of use on nonconforming lots. The minimum yard requirements of this ordinance shall not be construed as prohibiting the conversion of an existing building which does not meet the minimum yard requirements to another permitted use, so long as no further encroachment is made into the required yards.

601.3 Reconstruction. A nonconforming structure or structure containing a nonconforming use shall not be demolished and rebuilt as a nonconforming structure or structure containing a nonconforming use.

601.4 Extension or enlargement. A nonconforming use, structure or characteristic of use shall not be extended, enlarged or intensified except in conformity with this ordinance, provided, however, that any nonconforming use may be extended throughout any parts of a building which were manifestly arranged or designed for such use at the time of adoption or amendment of this ordinance, but no such use shall be extended to occupy any land outside such building.

601.5 Re-establishment. A nonconforming use, or characteristic of use, shall not be re-established after vacancy, abandonment, or discontinuance for any period of twelve (12) consecutive months, except where Section 601.6 applies. This provision shall not apply to any accessory apartment existing at the time of the adoption of this ordinance. "Accessory apartment" is defined as a self-contained housing unit incorporated within or accessory to a single family dwelling complete with its own sleeping, cooking, and sanitary facilities and a separate means of egress, which is located within a zoning district that permits residential use as a principal use. A use as an accessory apartment within these districts may be re-established after vacancy, abandonment, or discontinuance.

601.6 Reconstruction after damage. A nonconforming structure or structure containing a nonconforming use shall not be rebuilt, altered or repaired except in conformity with this ordinance after sustaining damage exceeding fifty percent (50%) of the replacement cost of the structure at the time of damage, provided that any permitted reconstruction shall begin within six (6) months from the time of damage and shall be

completed within six (6) months after the issuance of a building permit. A nonconforming use shall not be reestablished in a structure that has sustained damage exceeding fifty percent (50%) of the replacement cost of the structure at the time of damage.

602 Repair or maintenance of nonconforming structures

On any building devoted in whole or in part to any nonconforming use, work may be done on ordinary repairs, or on repair or replacement of non-bearing walls, fixtures, wiring or plumbing provided that the cubic content of the building as it existed at the time of passage or amendment of this ordinance shall not be increased. Nothing in this ordinance shall be deemed to prevent the strengthening or restoring to a safe condition of any building or part thereof declared to be unsafe by any official charged with protecting the public safety, upon order of such official.

603 Nonconforming lots of record

603.1 Single lots. In any district in which single family dwellings are permitted, notwithstanding limitations imposed by other provisions of this ordinance, a single family dwelling and customary accessory buildings may be erected on any single lot of record at the effective date of adoption or amendment of this ordinance. Such lot must be in separate ownership and not of continuous frontage with other lots in the same ownership. This provision shall apply even though such lot fails to meet the requirements for area or width, or both, that are generally applicable in the district provided that yard dimensions and other requirements not involving area or width, or both, of the lot shall conform to the regulations for the district in which such lot is located.

603.2 Adjoining lots. If two or more adjoining lots with continuous frontage are in a single ownership at any time after the adoption or amendment of this ordinance and such lots individually are too small to meet the yard, width or area requirements of the district in which they are located, such groups of lots shall be considered as a single lot or several lots of minimum permitted size and the lot or lots in one ownership shall be subject to the requirements of this ordinance.

604 Temporary nonconforming uses

A temporary use permit may be issued by the zoning administrator or his/her designee for an appropriate period of time not to exceed twelve (12) month increments for nonconforming buildings, structures or uses incidental to building construction or land development or deemed to be generally beneficial, provided that the owner of such temporary nonconforming use agrees to remove the temporary nonconforming use upon expiration of the permit.

605 Annexation

605.1 Designation of Zoning Classification. When annexation is accomplished, the city council shall specify an interim zoning district classification or classifications in the annexation ordinance, with such classification or classifications to become effective upon the effective date of the annexation.

605.2 Amendment proceedings to be initiated. Immediately after the effective date of any annexation, the zoning administrator or his/her designee shall initiate zoning amendment proceedings as specified by Article 10 for purposes of establishing or confirming appropriate zoning classifications for such annexed area, and the public hearing therefor shall be scheduled to be held not more than sixty (60) days after the effective date of annexation, further provided that the proposal to be brought before such hearing shall be to change all or part of such annexed area to classifications as requested by the owner or as recommended by

the planning commission, to be determined by the planning commission.

606 Visibility at intersections (Visibility triangle)

606.1 Sight clearance to be maintained. At each corner or each street intersection, a sight area shall be maintained. Within the sight area no fence, wall, sign or other structure, no slope or embankment, no parked vehicle, no hedge, foliage or other planting, and no other object or structure shall be placed, erected or maintained which will obstruct visibility within the sight area.

606.2 Dimensions of sight areas. The horizontal dimensions of sight areas are defined as triangular areas formed by the intersecting right-of-way lines at points which are fifteen (15) feet distant from the point of intersection of the right-of-way lines in commercial and industrial districts and twenty-five (25) feet distant from the point of intersection of the right-of-way lines in residential districts, measured along the right-of-way lines. Such sign areas shall be established regardless of the angles of intersection of the right-of-way lines. The vertical dimensions of sight areas are defined as that vertical space between the heights of two and one half (2 ½) feet and ten (10) feet in elevation above the nearest edge of street pavement of a paved street or above the nearest edge of riding surface of an unpaved street.

607 Accessory buildings

No accessory building shall be erected in any required yard except as herein provided, and no separate accessory buildings shall be erected within five (5) feet of any other building.

608 Buildings and lot to have access

Every building hereafter erected or structurally altered shall be on a lot adjacent to a public street or on a lot adjacent to a private street which meets all standards of the Land Development Regulations of the City of West Columbia. However, no private street or driveway shall be provided to commercial or industrial districts through any residential district established by this ordinance.

609 Structures in required yards

The general definition of “yards” as set forth in Section 301 states that yards are unoccupied and unobstructed by a structure or portion of a structure from thirty-six (36) inches above the finished grade level of the ground upward. Structures are not defined to include minor landscaping features such as ornamental pools, bird baths, paved surfaces, walkways, flagpoles, and mailboxes.

609.1 Steps and open porches without roofs shall be allowed in any required yard.

609.2 Eaves, cornices, gutters, and other minor architectural features projecting less than eighteen (18) inches from the main portion of a building shall be allowed to project into any yard.

609.3 In C-2, LM, and HM districts, structures and devices incidental to servicing, and roofs over such structures and devices are permitted within required front yards, provided that they do not constitute a substantial impediment to visibility across such yards which would contribute to the creation of traffic hazards, and further provided that servicing operations in connection therewith can be conducted so as not to interfere with public use of adjacent sidewalks or public streets.

609.4 No fence or wall shall be permitted in any required front yard which substantially impedes vision above a height of thirty-six (36) inches, except as provided for C-2, LM, and HM districts in 609.3 above.

609.5 Screening walls, fences, and hedges over thirty-six (36) inches in height that substantially impede vision may be permitted in a required front yard as a special exemption, however, screening walls, fences, and hedges not over seven (7) feet in height are permitted outright in side and rear yards, provided no screening wall or fence in excess of five (5) feet is permitted within six (6) feet of a residential structure on adjacent property. Height in excess of seven (7) feet must be approved by the board of zoning appeals as a special exception.

609.6 Retaining walls in excess of thirty-six (36) inches in height may be permitted as a special exception in any yard, however, retaining walls that do not project more than thirty-six (36) inches above the grade level at the property lines of adjoining lots are permitted outright.

609.7 Signs are permitted to encroach upon required yards in certain instances as set forth in Article 9.

609.8 Screening between commercial or industrial uses and lots zoned residentially, as required by Section 805 of this ordinance, is permitted in a required yard.

609.9 Also permitted to project into required yards from a principal or accessory structure is apparatus needed for the operation of active and passive solar energy systems, including, but not limited to, awnings, overhangs, movable insulating walls and roofs, detached solar collectors, reflectors, and piping. Such solar system related projections shall not restrict vehicle driver or pedestrian visibility.

610 Orientation of required yards

In interpretation of requirements related to establishment of required yards, the zoning administrator or his/her designee shall apply the following interpretation to the orientation of such yards.

610.1 Through lots. In the case of through lots, unless the prevailing front yard pattern on adjoining lots indicates otherwise, front yards shall be provided on all frontages. Where one (1) of the front yards that would normally be required on a through lot is not in keeping with the prevailing yard pattern, the zoning administrator or his/her designee may waive the requirement for the normal front yard and substitute therefor a special yard requirement which shall not exceed the average of the yards existing on adjacent lots.

610.2 Corner lots with two frontages. In the case of corner lots with two (2) frontages, a front yard of the required depth shall be provided on the frontage of the street having the higher traffic volumes. Where the traffic volumes on both streets are approximately equal, the required depth shall be provided on the street frontage having the minimum lot width. A second front yard of half the depth required generally for front yards in the district shall be provided on the other frontage.

610.3 Corner lots with more than two frontages. In the case of corner lots with more than two (2) frontages, the zoning administrator or his/her designee shall determine the front yard requirements, subject to the following limitations:

- (1) At least one (1) front yard shall be provided having full depth required generally in the district; and
- (2) No other front yard on such lot shall have less than half the full depth required generally.

610.4 Appropriateness of orientation. Notwithstanding the above, the zoning administrator or his/her designee may determine that the most appropriate orientation for any required yard is different from the

orientation as set forth in such instance that it appears that such different orientation will further the intent of this ordinance. When a structure is to be built which will contain more than one (1) dwelling unit, the orientation of required yards shall be based upon both the orientation of the lot and the orientation of the structure. The zoning administrator or his/her designee may impose an orientation of yards different from the orientation set forth in this section and elsewhere in this ordinance subject to appeal from an administrative decision of the zoning administrator or his/her designee.

611 Off-street automobile parking and storage

Off-street automobile parking and storage space shall be provided on every lot in which any of the uses mentioned in this section are hereafter established except in the C-1 District. Such automobile parking or storage space shall be provided with vehicular access to a street or alley and shall be equal in area to at least the minimum requirements for the specific uses as set forth below. Each automobile parking space, along with its necessary maneuvering space, shall have an area of at least three hundred (300) square feet.

709 PUD Planned unit development districts

The intent of the planned unit development districts is to derive the benefits of efficiency, economy, and flexibility by encouraging unified development of large sites, while also obtaining the advantage of creative site design, improved appearance, compatibility of uses, optimum service by community facilities, and better functioning of vehicular access and circulation.

It is the intent of these regulations to allow development of large sites subject to specific regulations concerning permitted uses, but only subject to regulations concerning lot area, building coverage, yard spaces, and building height insofar as the city council shall deem appropriate to fulfill the intent of this ordinance, upon presentation of certification from the owners, developers or other parties at interest in the development of such sites that they will adhere to development policies which will fulfill the intent of this ordinance.

709.1 Types of Planned Unit Development Districts. Two types of planned unit development districts accommodating residential and nonresidential uses are created as follows:

709.1.1 PUD-R Planned Unit Development --Residential: The PUD-R district is intended to accommodate primarily residential uses with nonresidential uses integrated into the design of such districts as secondary uses.

709.1.2 PUD-C Planned Unit Development--Commercial: The PUD-C district is intended to accommodate primarily nonresidential uses with residential uses integrated into the design of such districts as secondary uses.

709.1.3 Intent. The types of residential dwelling units, and the types of nonresidential uses allowed to be established in such districts increase with increasing site size of such districts, based upon the premise that increased site size will allow proper design including functional interrelations, buffer treatments separating uses with potentially incompatible characteristics of use, design of access patterns, and relationships of uses within such planned unit developments with uses in adjacent districts. It is the intent of the ordinance that such design and planning features be incorporated properly into any PUD district hereafter created, and that the planning commission and city council shall consider the existence and appropriateness of such features before any amendment to the zoning map is adopted to create such district.

709.2 Permitted Principal Uses and Structures. Permitted uses and structures vary with increasing size and are different for PUD-R and PUD-C districts. Such uses are permitted as per the uses enumerated for specific districts in Sections 300 through 708 above. Where uses for more than one (1) district are permitted, the uses of the less restrictive district shall be permitted. Permitted principal uses and structures for various site sized and types of PUD districts are as follows:

<u>Site Size in Acres</u>	<u>PUD-R Uses Permitted as for the Following Districts</u>	<u>PUD-C Uses Permitted as for the Following Districts</u>
4 but less than 8	R-1, C-3	C-3, C-2
8 but less than 15	R-1, C-3	C-2, R-1
15 but less than 25	R-1, C-3	LM, R-1
25 or more	LM, R-1	LM, R-1

709.3 **Maximum Area of Commercial or Industrial Uses in the PUD-R Districts.** In PUD-R districts in which commercial or industrial uses are permitted, the total gross floor area of such commercial or industrial uses shall not exceed the percentages listed below as related to gross floor area of all structures within the PUD at any time. In addition, in PUD-R district in which commercial or industrial uses are permitted, the area of land devoted to such uses, including land coverage of structures, parking, and related characteristics and accessory uses thereto, shall not exceed the percentages listed below as related to total PUD site size at any time.

<u>Total PUD Site Size in Acres</u>	<u>Maximum Percentages of Gross Floor Area And Maximum Percentage of Site Area for Commercial or Industrial Structures and Uses</u>
4 but less than 8	20
8 but less than 15	20
15 but less than 25	30
25 or more	40

Provided however, that these percentages shall apply to commercial and industrial uses, and not to other nonresidential uses, such as schools, parks, community buildings or public facilities.

709.4 **Permitted Accessory Uses and Structures.** Accessory uses and structures shall be permitted as for the least restrictive districts indicated in Section 709.3 for any specific site size.

709.5 **Permitted Special Exceptions.** No special exception actions are required to establish any specific use. Uses and structures permitted in the least restrictive districts indicated in Section 700.2 for any specific site size are permitted outright; provided, however, that the planning commission shall ascertain that the effects and benefits usually derived from safeguards and conditions normally imposed upon special exceptions permissible for districts as listed in Sections 700 through 708 will substantially be met by the terms of the proposed planned unit development.

709.6 **Prohibited Uses and Structures.** Certain uses and structures shall be prohibited as for the least restrictive districts indicated in Section 709.3 for any specific site size.

709.7 **Minimum Lot Area.** No minimum lot area is required for any specific structure; however, minimum site size to accommodate specific uses shall be as listed in Section 709.3

709.8 **Minimum Lot Width, Minimum Yard Requirements, Maximum Lot Coverage, Maximum Height of Structures.** Minimum setbacks, minimum lot width, minimum yard size, maximum lot coverage, and maximum height are not regulated within PUD districts; provided however, that the planning commission shall ascertain that the characteristics of building siting shall be appropriate as related to structures within the planned unit development and otherwise fulfill the intent of this ordinance.

709.9 **Minimum Off-street Parking and Loading.** Off-street parking and loading requirements as set forth in Article 7 shall be met as for the least restrictive districts indicated in Section 708.3 for any specific site size. If warranted by unique characteristics, or documented parking demand for similar developments, or both, the city may allow reductions in the number of parking spaces, including a shared parking plan. A parking study shall be submitted to justify the reduction in parking being requested

709.10 **Signs.** A common signage plan shall be submitted with the Descriptive Statement. The Common Signage Plan must describe the location, size and design of the proposed signs. Exterior signs should

provide for modest, coordinated and complimentary exterior sign locations, configurations and color throughout the site and should not be visually dominating. All freestanding signage within the PUD should complement signage affixed to the structures within the site. The Planning Commission may require that signs for multiple businesses within the PUD be integrated and consolidated into one or more sign structures. Except as specifically excluded in the Descriptive Statement, the provisions of Section 905 shall apply. The provisions of Section 908 shall apply to all PUD's..

709.11 Administrative Application and Review Procedures.

709.11.1 General. The establishment of a PUD district shall be by amendment to the zoning map accompanied by certain sureties that the development will be in harmony with the intent of this ordinance and that the public interest in adequate site design, access, and community facilities and amenities will be defended. Application for amendment to establish a PUD district shall be subject to the provisions of Article 10, "Amendments" and in addition, the procedures described below shall apply. It is the intent of this ordinance that the public interest will be served not only by consideration of those specific criteria set forth herein, but also by consideration of the total anticipated effect of the planned unit development upon the community at large. The provisions of the PUD district represent a relaxation of specific site design requirements as applied to other districts herein, and in return for the design flexibility granted thereby, the applicant for amendment to PUD district classification, but requesting the PUD designation and making application therefore shall agree to furnish information about the proposed development, and later to abide by certain conditions and safeguards as may be imposed by the planning commission in establishing such developments. To that end, the regulations set forth herein are minimum requirements and it is the intent of this ordinance that the planning commission may impose conditions and safeguards in excess of, or in addition to, the specific requirements set forth herein, and that guarantee of meeting the minimum requirements set forth herein does not per se create an indication that an applicant should be entitled to such an amendment, and notice is hereby given to that effect.

709.11.2 Pre-application Conference. The applicant is encouraged to communicate his intentions to establish a planned unit development and the proposed characteristics thereof, to the planning commission prior to initiating an application for amendment in order to avoid undue delay in the review process after initiating such application, and in order to facilitate review of materials which may be in preliminary form, and in order to avoid unnecessary expense in preparation of materials in final form which may later be found to be unacceptable or incomplete.

709.11.3 Application for Amendments. The applicant shall make application for an amendment to PUD classification as specified by Article 9 herein.

709.11.4 Site Development Plans to be Submitted to Planning Commission for Review. The applicant shall submit site development plans to the planning commission for review, which shall be similar in content and format to preliminary plats required for review by the subdivision regulations of the City of West Columbia, South Carolina, and in addition, shall show locations of all buildings proposed to be constructed in such planned unit development, drawn approximately to scale, and in addition shall indicate the proposed uses of all such buildings, and in addition, shall contain such other information as may be deemed reasonably appropriate for planning commission review.

709.11.5 Descriptive Statement to be Submitted to Planning Commission for Review. The applicant shall also submit a descriptive statement describing the characteristics and standards to

be followed in developing the proposed planned unit development. The descriptive statement shall generally include, but not be limited to the following:

- (1) Legal description of proposed development boundaries.
- (2) Total number of acres in the development area.
- (3) Number of acres devoted to residential, commercial, industrial, and other nonresidential uses to reflect requirements of Section 709.3.
- (4) Number of dwelling units of various types and overall density thereof.
- (5) Number of off-street parking and loading spaces as needed to meet requirements of individual buildings as required by Section 709.9.
- (6) If commercial development is proposed, indication of economic feasibility and justification for size of facilities.
- (7) Description of open space uses and area proposed, adequacy thereof to serve anticipated demand, and if dedication of open space is proposed, procedures and conditions thereof in detail.
- (8) If a homeowners association or other group maintenance or group ownership features are to be included, a detailed description of the proposed procedures and operation thereof.
- (9) An outline of development phasing indicating the timing of development of all proposed facilities, and justification of development phasing with respect to nonresidential facilities in relation to residential facilities.
- (10) Design standards, administrative procedures, and other characteristics which will guarantee the development of the project as an integrated, functionally operable, well planned whole.
- (11) Other such information or descriptions as may be deemed reasonably appropriate for planning commission review.

709.11.6 Planning Commission and City Council Hearing. A public hearing shall be held in accordance with procedures set forth in Article 12, except that such hearing shall be a joint hearing before the planning commission and the city council simultaneously.

709.11.7 Planning Commission Recommendation. The planning commission shall make a recommendation upon the proposal which shall be advisory to the city council. Requirements of Article 12 are applicable if the planning commission should fail to report within the time limit established by Article 12.

709.11.8 City Council Approval. The city council may, after fulfilling the applicable requirements of this section and all applications for amendment, approve the PUD submitted to it by the planning commission.

709.11.9 Issuance of Zoning or Building Permits. The zoning administrator or his/her designee shall not issue any zoning permit and the building official shall not issue any building permit for work to commence within any PUD district until the applicant for amendment which established such districts shall have:

- (1) Filed with the city clerk and recorded with the Register or Deeds of Lexington County plats showing all proposed features of the planned unit development as approved by the city council which approval shall be certified by the city clerk.
- (2) Completed any necessary agreements with the city that the city may become a party to deed restrictions and other restrictive covenants related to the planned unit development, and recorded such agreement with the city clerk and the Register of Deeds of Lexington County.
- (3) Recorded with the Register of Deeds of Lexington County all required deed restrictions or other restrictive covenants as required by the city council upon approval of the amendment establishing the planned unit development district.
- (4) Recorded with the city clerk and with the Register of Deeds of Lexington County, the descriptive statement as approved by city council setting forth and committing the developer to certain design standards, development phasing schedules, and other pertinent matters.
- (5) Completed the posting of a bond or giving of other surety that adequate progress will be made in developing the project as may be required by Section 709.3.

709.12 Changes of Plans for Planned Unit Developments. Changes which do not require changes of the boundaries of an established PUD district or establishment of a new PUD district are not considered amendments to the zoning ordinance. Any change in boundary of such PUD district shall be accomplished only by following procedures as set forth in Article 12 herein. Changes in the approved characteristics or agreements relating to a PUD district, but not involving change in the boundary thereof shall be classed as either major changes or minor changes and shall be approved or disapproved as follows:

709.12.1 Minor Changes: Revisions of minor characteristics of the planned unit development, such as relocation of driveways or revision of floor plans of specific structures, may be authorized by the planning commission, provided that such authority is granted to the planning commission by the approved and recorded descriptive statement concerning development of the planned unit district. If the planning commission fails to approve a request for a minor change, the developer or other party at interest may then seek a change by the regular amendment process as outlined below for major changes.

709.12.2 Major changes. Major changes which materially affect the characteristics of the planned unit development shall follow the same procedural requirements as for the amendment originally establishing the planned unit district, including commission review, public hearing, and the city council determination, as set forth in Article 12 herein.

709.12.3 It shall be the duty of the zoning administrator or his/her designee to determine whether any specific request shall be considered a major change or a minor change, provided, however, that the applicant for change shall have the right to have any request for change processed as a major change.

709.12.4 The zoning administrator or his/her designee shall issue no zoning permit or certificate of occupancy and the building official shall issue no building permit in connection with any action related to such changes until such changes have been duly recorded as for the original documents recorded as set forth in Section 709.11.9 above.

709.13 Failure to Begin, Failure to Complete or Failure to Make Adequate Progress. The descriptive statement as approved by the planning commission and duly recorded shall set forth the development schedule for the project including phasing of development of non-residential uses in relationship to residential use. The planning commission shall require the posting of a bond with a corporate surety to guarantee that the schedule as set forth in the descriptive statement will be materially adhered to in order to guarantee construction of streets, utilities, and other facilities and amenities or to allow for re-certification or improper development characteristics such as failure to develop areas designated as common open spaces. If there is failure to begin, or failure to complete, or failure to make adequate progress as agreed in the descriptive statement, the planning commission may enforce and collect upon such bonds or sureties as described above, or may change the district classification of the planned unit development in accordance with the provisions of Article 10, and thus terminate the right of the applicant to continue development, or may initiate action to charge the developers with specific violation of the zoning ordinance subject to the penalties set forth in Article 11 or any appropriate combination of the above remedies may be taken.

709.14 Terms of this Section to Prevail. In case of any conflict of the terms of Section 709 with the terms of other sections of this ordinance, the terms of Section 709 shall prevail.

809.20.7 The provisions of Subsection 809.20.2 and Subsections 809.20.3 and 809.20.4 shall also apply to secondary signs.

809.20.8 It shall be the duty of the permittee, his agents and employees present in the premises to ensure compliance with the provisions of this ordinance, and any person who has a duty to ensure compliance with this section shall be guilty if he/she knowingly fails to fulfill that duty.

809.21 Respondent Superior

809.21.1 It is the duty of the permittee and his/her agents to insure that the provisions of this ordinance are made known to its employees and performers.

809.21.2 Every act or omission by an employee or performer constituting a violation of the provisions of this ordinance shall be deemed the act of omission of the permitted and his agent if such act or omission occurs either with the authorization, knowledge or approval of the permittee or his/her agent or as a result of the failure to inform the employee or performer of the provisions of this ordinance or a result of the failure to supervise the employee's or performer's conduct. The permittee and his/her agent shall be held liable for such act or omission in the same manner as if the permitted and his/her agent committed the act or caused the omission.

A permittee and his/her agents shall be responsible for the conduct of all employees or performers while on the licensed premises and any act or omission of any employee or performer constituting a violation of the provisions of this ordinance shall be deemed the act or omission of the permittee and his/her agents for the purposes of determining whether the permit shall be revoked, suspended or renewed.

809.22 Injunction and Violations

A person who operates or causes to be operated a sexually oriented business without a valid permit and/or license or in violation of Section 809.12 of this ordinance is subject to a suit for injunction as well as prosecution for criminal violations. Such violations shall be punishable by a fine of two hundred dollars (\$200.00) per offense or thirty (30) days imprisonment.

A sexually oriented business is subject to any and all city and state nudity/indecency statutes or ordinances, existing now or in the future; nothing contained herein shall be intended to allow any activities contrary to the statutes or the ordinances.

809.23 Violations constitute misdemeanors

It shall be unlawful for any owner, licensee, manager, employee or contract performer to violate the conditions, requirements and regulations imposed by this ordinance. Each violation shall constitute a separate offense. Each violation is punishable by a fine of not more than five hundred dollars (\$500.00) or thirty (30) days imprisonment.

809.24 Severability

The provisions of this section of the zoning ordinance regulating sexually oriented businesses are hereby declared to be severable and if any section, subsection, sentence, phrase, or clause of this ordinance shall be held or declared by a court of competent jurisdiction to be invalid or unenforceable, the validity of the remaining sections, subsections, provision, sentences, clauses or phrases shall not be affected thereby.

- (b) Applicant must show that a proposed antenna and equipment cannot be accommodated and function as required by applicable regulations and applicant's technical design requirements without unreasonable modifications on any existing structure or tower under control of applicant.
- (c) Applicant for a permit in a residential district must show that the area cannot be adequately served by a facility placed in a non-residential district for valid technical reasons.
- (d) Prior to consideration of a permit for location on private property which must be acquired, applicant must show that available publicly owned sites, and available privately owned sites occupied by a compatible use, are unsuitable for operation of the facility under applicable communications regulations and applicant's technical design requirements.

(e) Applicant must show that a new tower is designed to accommodate additional antennae equal in number to applicant's present and future requirements.

(f) Applicant must show that all applicable health, nuisance, noise, fire, building and safety code requirements are met.

(g) A communication tower must not be painted or illuminated unless otherwise provided by state or federal regulations.

(h) A permit for a proposed tower site within 1,000 feet of an existing tower shall not be issued unless the applicant certifies that the existing tower does not meet applicant's structural specifications and applicant's technical design requirements, or that a collocations agreement could not be obtained.

(i) Applicant must show by certificate from a registered engineer that the proposed facility will contain only equipment meeting FCC rules, and must file with the zoning administrator or his/her designee a written indemnification of the municipality and proof of liability insurance or financial ability to respond to claims up to \$1,000,000.00 in the aggregate which may arise from operation of the facility during its life, at no cost to the municipality, in form approved by the municipal attorney.

(l) Prior to issuing a permit, the zoning administrator or his/her designee may make use of technical services of the Municipal Association of South Carolina to determine that the standards in this section of the ordinance are met.

810.2.4 Appeal to the Zoning Board. Applicant may appeal to the Board of Zoning Appeals as follows:

(1) Failure of the zoning administrator or his/her designee to act on an application which is determined to be complete under this section within 45 days, unless extended by agreement, may be considered by applicant to be a denial of permit which is subject to appeal to the board of appeals.

(2) Applicant may appeal to the board for a variance from general zoning district regulations in this section, but not from any other conditions in this section. Towers exceeding height limitations may be permitted only by special exception pursuant to Section 810.3.

(3).. Applicant may apply directly to the board for a permit for any tower as a special exception pursuant to Section 810.3.

810.3 Special Exceptions.

A tower, pole, or antenna may be permitted by special exception granted by the board of zoning appeals after public hearing and findings of fact based on the following criteria:

Special Exception Criteria:

The Board of Appeals must find and conclude:

Application conditions

1. All application requirements and conditions imposed by Section

810.2 of this ordinance for conditional uses are met except height limitations and setbacks.

Height limitations

2. If additional tower height is requested, total tower height will not exceed 150% of the maximum height permitted in the district as a conditional use.

Necessity for additional height

3. Applicant has demonstrated that additional height above that permitted by conditional use regulations is necessary for service to occupants of an area within the municipality.

Setback requirements; additional

4. Setback requirements and such additional conditions are conditions established by the board as it deems necessary to remove danger to health and safety, and to protect adjacent property.

MASC technical assistance required on special exception or appeal from action on conditional use

5. Prior to approving a permit by special exception or on appeal from action of the zoning administrator or his/her designee on an application for a conditional use, the board may make use of technical services of the Municipal Association of South Carolina to determine that the standards in Section 810.2 are met.

Denial on substantial evidence

6. The Telecommunications Act of 1996 requires that a denial of a permit be supported by substantial evidence.

Variance prohibited

7. The board may not grant a variance from the standards imposed for a communication tower or antenna in connection with granting a special exception, except as permitted by Section 810.2.4.

Section 811 Landscaping Regulations

811.1 Scope of Landscaping Regulations

811.1.1 Applications

Unless otherwise designated in this section, the regulations set forth herein apply to development and improvements of all real property within the following zoning districts:

D	Development
R-1	Residential (high-density)
C-1	Intensive Commercial
C-2	General Commercial
C-3	Restricted Commercial
LM	Light Manufacturing
HM	Heavy Manufacturing

811.1.2 Definitions

In addition to the definitions set forth in Article 3, the following terms shall have the following definitions:

Activity – The performance of a function or operation which constitutes the use of land; specific activities shall be considered as defined in this zoning ordinance.

Berm – A hill or slope (man-made or natural) that represents a change in elevation and serves as a screening tool.

Buffer – A landscaped area designed to provide separation and screening between land uses of different intensities by reducing the effects of traffic, noise, glare, trash, activity, vibration, odor, visual disorder and any other harmful or noxious effect associated with more intensive uses.

Caliper – The diameter of nursery stock, measured at six (6) inches above the ground for up to and including four-inch caliper size, and measured at twelve (12) inches above ground for nursery stock larger than four-inch caliber size.

Circumference – The external surface of the trunk of a tree, measured at breast height, and divided by 3.14 (pi) to determine tree diameter.

Critical Root Zone – A protection zone measured as one (1) foot in radius around a tree for every one (1) inch in diameter of the tree.

Deciduous – Not evergreen, shedding leaves annually.

Diameter at Breast Height (DBH) – The accepted measurement of established trees in the ground is their diameter at breast height, measured at four and one-half (4 ½) feet above grade. To obtain the DBH, measure the circumference of the tree in inches and divide by 3.14 (pi).

Display Area or Lot – Any unenclosed area which exceeds ten thousand (10,000) square feet for the display of merchandise including, but not limited to automobiles trucks, boats, and travel trailers.

Evergreen – A tree, shrub, or other plant whose leaves remain green throughout all seasons; as opposed to “deciduous.”

Ground Cover – See “Stabilizing Vegetation.”

Hardwood Tree – A broad-leaved tree, so called because its wood is harder and more tightly grained than

that of a softwood or needle-bearing conifer. Examples are oak, hickory, beech and poplar.

Landscape Administrator – The official or officials assigned to administer, interpret and enforce the landscape regulations.

Masonry Wall – A wall whose face is constructed of brick, stones or stucco.

Natural Condition – Refers to a native, indigenous, unpruned, unaltered setting or planting.

Parking Lot – Any parcel of land, or portion thereof, which is used for parking, loading, or associated circulation of vehicles, whether paved or unpaved.

Screen (Screening) – Any approved structure or vegetative stand, or combination of both, which is used for the purpose of blocking views, noise, light or glare from neighboring properties and, where required, road rights-of-way.

Shrub – Any hard-wooded perennial plant of a species which normally reaches or is maintained at a height between twelve (12) inches and eight (8) feet.

Softwood Tree – A coniferous (cone-bearing) tree such as pine, cedar or bald cypress.

Slatted Fence – Any wire or similar fence with the view through such fence obstructed with material interwoven into the fencing.

Stabilizing Vegetation – Any plant material that serves to prevent soil erosion by covering large areas of ground, and which does not grow beyond twelve (12) inches in height; may also be referred to as “ground cover.”

Street Frontage – An area of land adjacent to and fronting along a street right-of-way.

Thoroughfare – Any major arterial roadway, one of the principle routes into and through the community.

Tree – A self-supporting woody perennial plant with a trunk diameter of at least two (2) inches measured at six (6) inches above ground level, with a mature height of at least twelve (12) feet, and usually having one main stem or trunk and many branches.

Tree, Canopy – Any single-stem tree of a species which normally reaches a height of thirty (30) feet or more and has a crown spread of twenty (20) feet or more at maturity.

Tree, Trophy – A tree of significance due to its size, relative to its species, which should be preserved and protected. Guidelines detailed within this section address the circumstances in which preservation of trophy trees is feasible. The specifications for determining trophy trees are as follows:

<i>Type</i>	<i>Minimum Size</i>	<i>Examples</i>
Hardwoods	24” DBH	Oak, Hickory, Beech, Poplar
Softwoods	30” DBH	Pine, Cedar, Bald Cypress
Understory	12” DBH	Dogwood, Redbud, American Holly

Tree, Understory – A single- or multi-stem tree of a species which normally reaches a height between eight (8) feet and thirty (30) feet and has a crown spread of less than twenty (20) feet at maturity.

Underbrush – Naturally occurring vegetation and vines that are not necessarily shrubs or trees.

Visibility Triangle – Necessary sight lines maintained at street intersections as described in Section 606.

811.2 General Landscaping Requirements

811.2.1 Pre-Development Activity

- A. The appropriate land disturbance permit(s) must be obtained prior to the removal of any stumps, roots systems, or stabilizing vegetation.
- B. Clearing and landscape plans are required as part of the review process for construction or expansion of high-density residential uses, commercial uses and manufacturing uses permitted specifically or as special exceptions in the zoning districts listed in Section 811.1.1. At the determination of the Landscape Administrator, any other uses permitted in the zoning districts subject to the landscaping requirements may be required to prepare clearing and landscape plans. The plans must demonstrate how the proposed development will meet the requirements of the ordinance as well as show various existing conditions. Clearing and landscape plans shall contain, at a minimum, the following information:
 - The name of the proposed development.
 - The names, addresses, and telephone numbers of the property owner, developer and project designer.
 - A location map showing the proposed project and its relationship to the roadway network.
 - Identities and uses of adjacent properties.
 - Total acreage of the parcel.
 - Location of any existing and proposed structures.
 - Location of any service areas, utilities, storage areas, parking lots.
 - Location and identification of all trophy trees, canopy trees with a DBH of eight (8) inches or greater, and all understory trees with a DBH of four (4) inches or greater.
 - The effect of the clearing plan, if any, on the trees identified above.
 - All proposed landscaping and watering systems required by these landscape regulations, with all plant species labeled and scaled to show location and canopy spread at time of installation.
 - A table of planting materials that states species, number, and size of trees and shrubs at the time of planting.
- C. The scale of the clearing and landscaping plan must be appropriate to convey all required information, but no smaller than one inch equals one hundred feet (1 to 100), and must show the true size, shape and location of all existing and proposed features and landscaping.
- D. Two copies of the clearing and landscaping plan shall be submitted to the Landscape Administrator prior to construction or development. The Landscape Administrator will review the plan and verify that it contains all the required information and conforms to the terms and intent of this section within fifteen (15) days after submission, prior to certifying in writing that the clearing and landscaping plan is approved.
- E. Once necessary development approvals have been granted and permits obtained (prior to the commencement of any clearing, grading, tree removal or construction on a site), the developer shall cause all protected trees to be marked with surveyor's flagging tape in a uniform manner that clearly identifies those trees to be retained. At the discretion of the Landscape Administrator, passive forms of marking may be used (continuous rope or flagging for areas that are heavily wooded).

811.2.2 Preservation Standards

- A. To the extent possible, existing canopy and understory trees located and identified in the clearing and landscaping plans shall be utilized in meeting the landscaping requirements of this section.
- B. Except as otherwise provided in Section 811.2.6, all trees identified as trophy trees shall be preserved.

- C. The thinning of understory trees and other vegetation may be approved or required by the Landscape Administrator to encourage the healthy maturation of preferred trees. In addition, utility companies may require the thinning of trees and shrubs pursuant to their regulations in order to maintain power and telephone rights-of-way. Such required thinning by a utility supersedes any authority granted to the Landscape Administrator.

811.2.3 Planting and Maintenance

- A. To the greatest extent possible, development plans shall address the location of excavation for activities such as utilities to avoid root damage to trees being preserved or planted.
- B. There shall be no construction, paving, grading, trenching, digging, excavation, operation of equipment or vehicles, cement rinsing, chemical usage or storage of materials within the critical root zone of any tree being preserved.
- C. New trees must be planted properly, to include soil / site preparation and protection of roots.
- D. Watering methods (irrigation and otherwise) must be adequate to maintain plant material in a healthy growing condition at all times.
- E. New trees and preserved trees must be properly maintained. Any trees required by these Regulations that die must be replaced within forty-five (45) days. The Landscape Administrator may extend this replanting period based upon climate and planting conditions of the season, or other unusual conditions.
- F. The property owner or tenant shall be responsible for regular weeding, mowing, fertilizing, irrigating, pruning or other maintenance of all plant materials that are required to comply with the landscaping regulations.
- G. The planting of stabilizing vegetation is encouraged to minimize erosion, add color and diversity to the landscaped areas, and minimize maintenance.

811.2.4 Species Selection

- A. The Landscape Administrator shall approve the number, type, size and location of all required trees in consultation with the developer or landowner. Together, they shall ensure creativity and variety in design, height, texture and color, and discourage single rows of identical plants, with the exception of street trees along thoroughfares that may have been planted or maintained in a single row. To the greatest extent possible, required landscaping shall replicate the surrounding natural conditions.
- B. Tree specimens proposed for planting shall be hardy for the particular soil and climate conditions they will encounter and shall be located in such a manner as to encourage mature growth. In order to limit the potential for maintenance problems and poor growth, hybrids, non-native species, and aggressive or invasive species should be avoided, as well as species outside their normal hardiness range.
- C. The minimum required caliper of trees to be planted as required by these regulations shall be twelve (12) feet tall with a minimum two (2) inch caliper for canopy trees, and six (6) feet tall with a minimum one and one-quarter (1¼") inch caliper for understory trees.
- D. At the time of installation, all shrubs shall be a minimum of twelve (12) inches tall as measured from the ground to the highest point on the shrub.
- E. To encourage diversity and flexibility of design, no more than sixty percent (60%) of any one

species of tree may be used in the overall development plan.

811.2.5 Location

- A. These provisions are not intended to conflict with signs or entrances to any residential, commercial or industrial development. All signs and entranceways should be designed and located in such a manner as to be enhanced by the landscaping requirements and existing vegetation. All locations of signs and driveways must meet the requirements of the zoning ordinance.
- B. Trees, berms, shrubs, planted and raised islands and service areas shall be placed outside the Visibility Triangle as described in Section 606 at any intersection with a road right-of-way, with the full mature size of the plant taken into account. In addition, these features shall be located in such a manner as to not create a vision hazard for those citizens navigating internal travel lanes, driveways or parking lots. Regular maintenance of these features to ensure a clean line of sight is required.
- C. The presence of underground or overhead utilities shall be taken into consideration when determining the type and placement of required trees. Consultation with SCE&G, City of West Columbia Water and Sewer Department, BellSouth, Time-Warner Cable, Palmetto Utility Protection Service and any other utility shall be required if the Landscape Administrator deems if necessary.

811.2.6 Exceptions to Tree Preservation Requirements

- A. In the event that a trophy tree is located on a lot within the proposed building footprint and no reasonable or practical redesign of the building to preserve the tree can be identified, the Landscape Administrator has the authority to allow the tree to be removed.
- B. Any tree that has been certified in writing by the appropriate federal, state, county, or city agency or department or by a public utility as being hazardous to public health, safety or welfare shall be removed, to include trees identified as trophy trees. Such determination by the appropriate federal, state, county or city agency or department or by a public utility shall be provided to the Landscape Administrator prior to the removal of such tree.

811.3 Land Use Compatibility

811.3.1 Application

Buffer yards shall be required in all zoning districts whenever:

- A use classified as industrial is adjacent to non-industrial use.
- A use classified as commercial is adjacent to any residential use.
- A use classified as multi-family is adjacent to any single-family residential use

811.3.2 Location

- A. Buffer yards are to be located on the property of the proposed or changing land use that is to be screened. Such buffer yards are to be located between the property line and any vehicular use areas, buildings, storage areas, service areas or other areas of activity on the property to be screened and shall extend along the entire property line abutting the less intensive land use.
- B. No vegetative screening or fencing required by this section shall be planted inside utility and drainage easements, excluding overhead easements, without the written approval of the easement holder. Any tree planted within the right-of-way of overhead utility lines shall

be an understory tree.

- C. Where front, side and rear yards (building setbacks) are required by the zoning ordinance, buffer yards may be established within such setbacks. If the setback requirement is less than the buffer yard requirement, the buffer yard width requirement shall prevail.

811.3.3 Determination of Buffer Yard Requirements

- A. To determine whether a buffer yard is required between two different land uses, and what the buffer width and landscaping requirements are, the following procedure is used:
 - 1. Identify the proposed new or expanding land use and each existing adjacent land use. Determine the impact factor of each of the identified uses as set forth in the Land Use Impact Table (Table 1). A proposed land use is considered to exist on an adjacent property when a building permit is issued for its use. If an adjacent property is vacant, and no building permit has been issued for its use, its use shall be determined by assigning it the highest level of use in its zoning classification.
 - 2. Determine the type of buffer yard required as set forth in the table on Buffer Yard Types (Table 2).
 - 3. Identify the buffer yard width and planting requirements for the required yard type in the Buffer Yard Description Table (Table 3). The simplified formula determines the number of trees and shrubs required in a buffer yard. The variable scale permits a wide buffer with fewer plants, or a smaller buffer that is more heavily planted.
 - 4. Notwithstanding the required buffer yard widths as set forth in this section, any buffer yard of less than fifteen (15) feet in width shall have a six-foot masonry wall along the length of such buffer yard.
- B. This process must be applied to each property line, except street frontages. See Section 811.7 for landscaping requirements for street frontages.

811.3.4 Buffer Yard Reductions

Notwithstanding any of the provisions set forth in this section, no property on which a buffer yard is required shall have a yard less than ten (10) feet in width. Any buffer yard that is less than fifteen (15) feet in width must contain a six (6) foot tall masonry wall along the entire length of such yard.

The width of a buffer yard and the required plantings may be reduced as follows by the addition of a fence or masonry wall, or if there are grade elevation changes.

- A. Fences. The addition of a closed wooden fence in the required transition yard allows the reduction of the required width of the applicable buffer yard by twenty-five percent (25%) if the solid fence meets the following requirements:
 - 1. Height and arrangement. The fence must be a minimum of six (6) feet in height, measured on the side facing away from the property to be screened. Such fence must also have its finished side facing away from the property to be screened.
 - 2. Materials. Rot-resistant wood is the acceptable material. Chain link fences, even with slats installed, does not meet buffer yard requirements.
 - 3. Required Plantings. The number of required shrubs is reduced by fifty percent (50%) in a buffer yard in which a fence is installed.

- B. **Masonry Walls.** The addition of a masonry wall along the length of the required buffer yard allows reduction of the required yard by fifty percent (50%) and the amount of required planting as follows, if the wall meets the following standards:
1. **Height.** The wall must be at least six (6) feet in height measured on the side of the wall facing away from the property to be screened.
 2. **Materials.** Face materials shall be brick, stone, or stucco. Cinder block may be used for support, but is not acceptable as a face surface.
 3. **Required plantings.** If a masonry wall that meets the above standards is installed, the planting of shrubs shall be optional and understory trees may replace one-half of the required canopy trees. The requirement of Section 811.3.2 (B) that one-half of the buffer yard's canopy trees must be evergreen still applies.
- C. **Grade Elevation Changes.** The existence of a natural or man-made grade separation in the required buffer yard allows reduction of such yard by twenty-five percent (25%) in width if said elevation change achieves a screening effect similar to a wall or fence and meets the following standards:
1. **Elevation.** The grade change must be at least six (6) feet in elevation.
 2. **Slope.** The side slopes of such grade shall not be greater than three to one (3:1).
 3. **Retaining Wall.** A greater slope is allowable if it is retained by a structurally sound retaining wall that meets engineering standards for such a wall.
 4. **Relationship to Adjacent Properties.** The developing property must be located at an elevation lower than the properties from which it is to be screened.
 5. **Location of Required Plantings.** In order to maximize the effectiveness of the screen, the required plantings shall be located at the top of the slope in the reduced buffer yard.

811.3.5 Buffer Yard Specifications

Except as provided above in Section 811.3.4 (Buffer Yard Reductions), trees planted in a buffer yard shall be canopy trees unless planted in an area under overhead power lines, in which case understory trees shall be used.

- A. **Species.** One-half of the required trees shall be locally adapted evergreen species.
- B. **Distribution.** Trees shall be distributed throughout the yard so as to minimize gaps between them. Trees counted to meet the required number shall be spaced at least ten (10) feet apart.
- C. **Shrubs.** All shrubs must be evergreen and shall be a minimum of three (3) feet in height when planted and shall be expected to reach a height of six (6) feet or greater within five (5) years of planting.

811.3.6 Land Use Changes

A change in land use to a more intense use requires full compliance with the buffer yard and screening requirements.

**Table 1
Land Use Impact**

	<u>Land Use</u>	<u>Impact</u>
1.	Residential Uses:	
	Single-family and duplexes	low
	Multi-family, three to ten units	medium
	Multi-family, more than ten units	high

	25,000 square feet or less	medium
	Over 25,000 square feet	high
3.	Office/Commercial Uses:

	Over 25,000 square feet	high
4.	Industrial Uses:	
	All industrial uses	high
5.	Other Uses:	

For any land uses not listed, the Landscape Administrator will determine the land use impact based upon classification of similar uses.

ARTICLE 11 BOARD OF ZONING APPEALS

1100 Establishment, membership, and proceedings of the board

A board of zoning appeals is hereby established which shall consist of five (5) members, a majority of which constitutes a quorum. Members shall serve overlapping terms of three (3) years. The initial board established under this ordinance shall be appointed as follows: two members to serve for one (1) year; two members to serve for two (2) years, and one member to serve for three (3) years or after that time until their successors are named. A vacancy shall be filled for an unexpired term in the same manner as the initial appointment. West Columbia City Council may remove any member of the board for cause. None of the members shall hold any other public office or position in the City of West Columbia.

1100.1 Officers. The board shall elect one of its members as chairman, who shall serve for one year unless re-elected or until a successor is elected and qualified. The board shall appoint a secretary who may be an officer of the City of West Columbia or of the zoning board.

1100.2 Proceedings. The board shall adopt rules of procedure to govern the operations of the board.

1100.3 Meetings. Meetings of the board are held at the call of the chairman and at such other times as the board may determine.

1100.4 Public notice. Public notice of all meetings of the board of zoning appeals shall be provided by publication in a newspaper of general circulation in the City of West Columbia. In cases involving variances or special exceptions conspicuous notice shall be posted on or adjacent to the property affected, with at least one such notice being visible from each public thoroughfare that abuts the property.

1100.5 Oaths and Subpoenas. The chairman, or in his or her absence, the acting chairman, may administer oaths and compel the attendance of witnesses by subpoena.

1100.6 Minutes. The board shall keep minutes of its proceedings, showing the vote of each member upon each question, or if absent or failing to vote, indicating that fact, and shall keep records of its examinations and other official actions, all of which must be immediately filed in the office of the board or the office of the zoning administrator or his/her designee, and must be a public record.

1101 Powers and duties of the board of zoning appeals

The board of zoning appeals shall have the following powers and duties:

1101.1 Administrative Review. To hear and decide appeals when it is alleged that there is an error in any order, requirement, decision or determination made by an administrative official in the enforcement of the zoning ordinance.

1101.2 Variance. To hear and decide appeals for variance from the requirements of the zoning ordinance when strict application of the provisions of the ordinance would result in unnecessary hardship. A variance may be granted in an individual case of unnecessary hardship if the board makes and explains the following findings:

(a) there are extraordinary and exceptional conditions pertaining to the particular piece of property;

(b) these conditions do not generally apply to other property in the vicinity;

(c) because of these conditions, the application of the ordinance to the particular piece of property would effectively prohibit or unreasonably restrict the utilization of the property;

(d) The authorization of a variance will not be of substantial detriment to adjacent property or to the public

good, and the character of the district will not be harmed by the granting of the variance.

(i) The board may not grant a variance the effect of which would be to allow the establishment of a use not otherwise permitted in a zoning district, to extend physically a nonconforming use of land, or to change the zoning district boundaries shown on the official zoning map. The fact that property may be utilized more profitably, should a variance be granted, may not be considered grounds for a variance.

(ii) In granting a variance, the board may attach to it such conditions regarding the location, character, or other features of the proposed building, structure or use as the board may consider advisable to protect established property values in the surrounding area, or to promote the public health, safety or general welfare.

1101.3 Special Exception. To permit uses by special exception subject to the uses set forth in the zoning ordinance, the board is specifically authorized to determine whether special exceptions should be granted. To this end, the board will grant special exceptions with such conditions and safeguards as are appropriate under this ordinance, or to deny special exceptions when not in harmony with the intent and purpose of this ordinance.

1101.4 Violation of Conditions and Safeguards. Violation of conditions or safeguards, when made a part of the terms upon which a variance or special exception is granted, shall be deemed a violation of this ordinance and punishable under Section 1005.

1102 Appeals to the board of zoning appeals

Appeals to the board may be taken by any person aggrieved or by any officer, department, board, or bureau of the City of West Columbia. The appeal must be taken within thirty (30) days from the date the appealing party received actual notice of the action from which the appeal is taken. The appeal is initiated by filing with the officer from whom the appeal is taken and the board of zoning appeals notice of appeal specifying the grounds of it. Appeals must be filed in writing on forms available from the zoning administrator or his/her designee specifying the type of appeal and stating the grounds under which the appeal is requested.

An appeal stays all legal proceedings in furtherance of the action appealed from, unless the officer from which the appeal is taken certified to the board, after the notice of appeal has been filed with him, that by reason of facts stated in the certificate a stay would, in his opinion, cause imminent peril to life and property. In that case, proceedings may not be stayed otherwise than by a restraining order which may be granted by the board or by a court of record on application, on notice to the officer from whom the appeal is taken, and on due cause shown.

The board shall fix a reasonable time for the hearing of an appeal or other matter referred to it, and give at least fifteen (15) days public notice of it in a newspaper of general circulation in the City of West Columbia, as well as due notice to the parties in interest and decide the same within a reasonable time. At the hearing any party may appear in person or by agent or by attorney.

In exercising the power above, the board of zoning appeals may, in conformity with the provisions of this chapter, reverse or affirm, wholly or in part, or may modify the order, requirements decision or determination, and to that end shall have all the powers of the officer from whom the appeal is taken and may issue or direct the issuance of a zoning permit. The board, in execution of its duties specified in this chapter, may subpoena witnesses and in case of contempt may certify this fact to the circuit court having jurisdiction.

All final decisions and orders of the board must be in writing and permanently filed in the office of the board as a public record. All findings of fact and conclusions of law must be separately stated in final decisions or orders of the board, which must be delivered to the parties of interest by certified mail.

In case of contempt by a party, witness, or other person before the board of zoning appeals, the board may certify this fact to the circuit court of Lexington County and the judge of the court, in open court or in chambers, after hearing, may impose a penalty as authorized by law.

1103 Appeals from the board of zoning appeals

Any person or person(s) who may have a substantial interest in any decision of the board of zoning appeals or an officer or agent of the City of West Columbia may appeal from a decision of the board to the circuit court in Lexington County by filing with the clerk of the court a petition in writing setting forth plainly, fully, and distinctly why the decision is contrary to law. The appeal must be filed within thirty (30) days after the decision of the board is mailed.

Upon the filing of the appeal, the clerk of the circuit court shall give immediate notice of it to the secretary of the board and within thirty (30) days from the time of the notice the board shall file with the clerk a certified copy of the proceedings held before the board of zoning appeals, including a transcript of evidence heard before it, if any, and the decision of the board including its findings of fact and conclusions.

The filing of an appeal in the circuit court from a decision of the board shall not ipso facto act as supersedeas, but the judge of the circuit court may in his discretion grant a supersedeas upon such terms and conditions as may seem reasonable and proper.

At the next term of circuit court or in chambers, upon ten (10) days notice to the parties, the presiding judge of the circuit court of Lexington County shall proceed to hear and pass upon the appeal on the certified record of the board's proceeding. The findings of fact by the board of zoning appeals shall be treated in the same manner as a finding of fact by a jury, and the court may not take additional evidence. In the event the judge determines that the certified record is insufficient for review, the matter may be remanded to the board of zoning appeals for rehearing. In determining the questions presented by the appeal, the court shall determine only whether the decision of the board is correct as a matter of law. In the event that the decision of the board is reversed by the circuit court, the board is charged with the costs, and the costs must be paid by the City of West Columbia which established the board of zoning appeals.

A party in interest who is aggrieved by the judgment rendered by the circuit court upon the appeal may appeal in the same manner as provided by law for appeals from other judgments of the circuit court.
